Epidemiology

Source of the outbreak(s) or origin of infection	Contact with infected animal(s) at grazing/watering Contact with wild species
Epidemiological comments	FMD infection continues to spread slowly in the affected districts. Limited vaccine available to deal with the outbreak. All the infected districts have been placed under quarantine with veterinary check-points also manned by police personnel placed at strategic areas to prevent cattle movement. Inspections and community education campaigns are currently on-going. All illegally moved cattle are being destroyed. This will deter farmers from illegally moving their cattle.

Control measures

Measures applied	Movement control inside the country Vaccination in response to the outbreak (s) Surveillance outside containment and/or protection zone Surveillance within containment and/or protection zone Traceability Quarantine Control of wildlife reservoirs Zoning No treatment of affected animals
